

Se você estiver utilizando o compilador code::blocks siga os procedimentos abaixo para criar, compilar e executar seus arquivos C++ neste compilador.

Para criar um arquivo fonte C++ faça o seguinte vá em FILE-> File

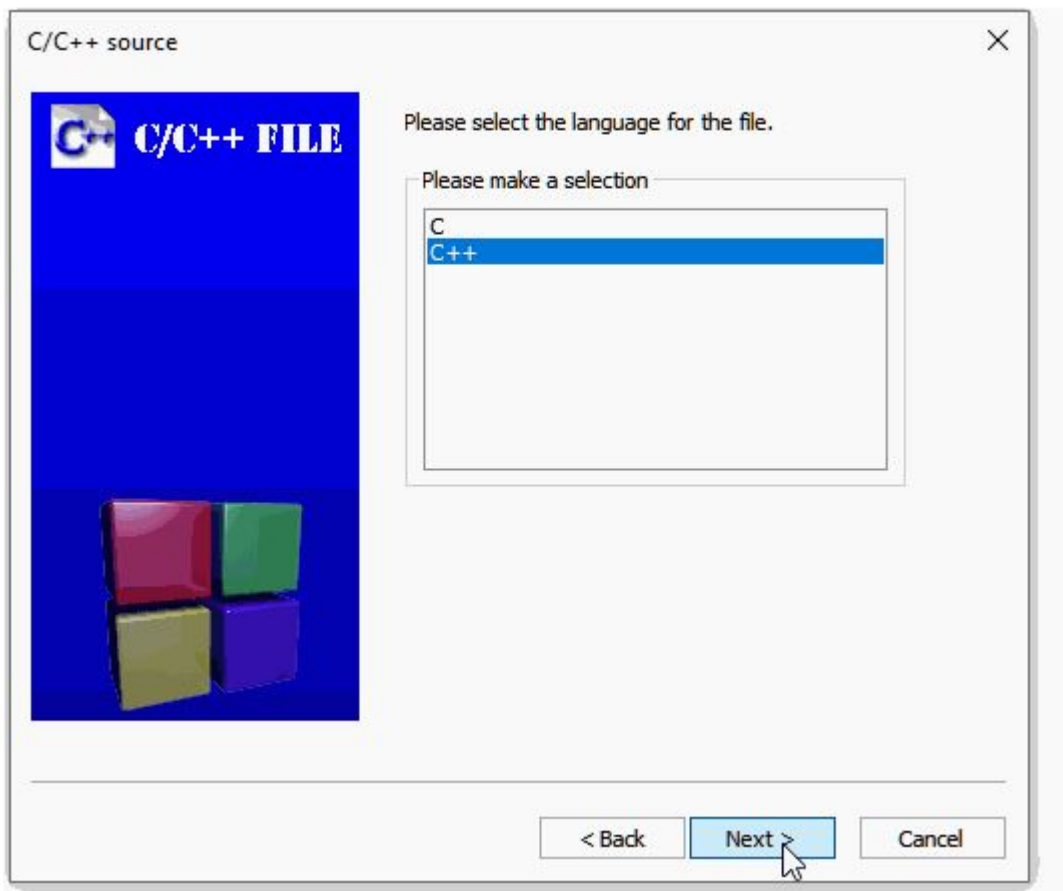

Escolha C/C++ source

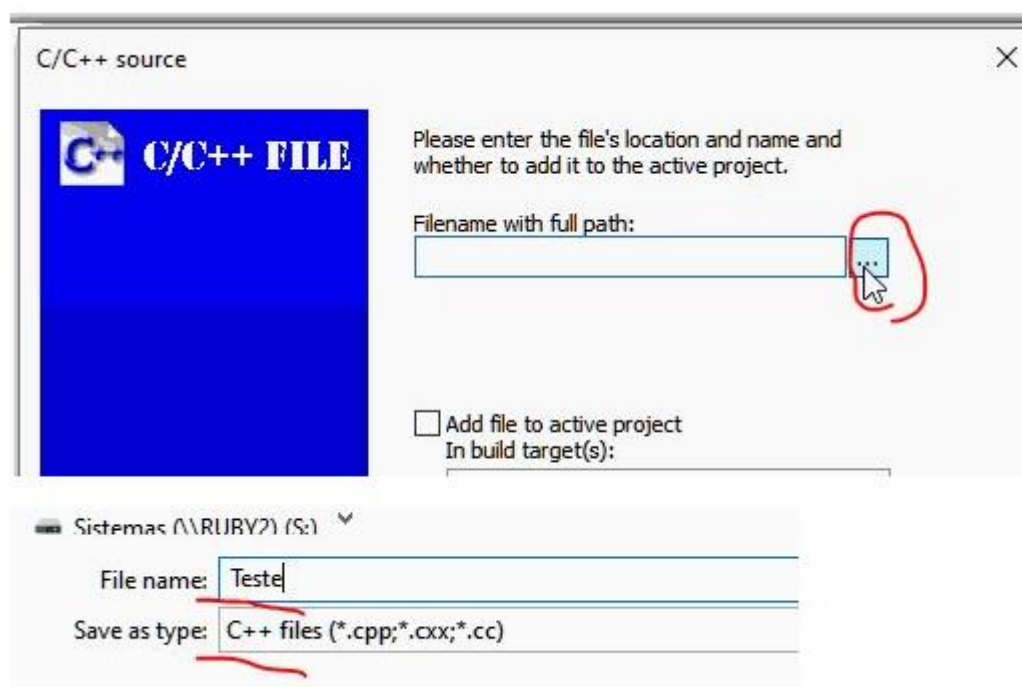

Clique em NEXT

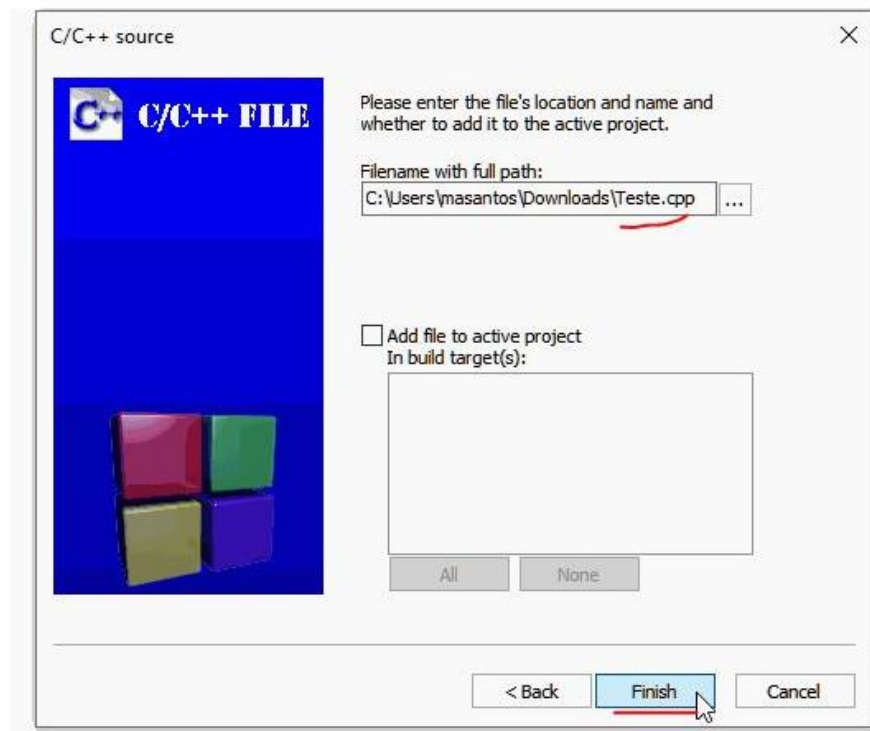

Seleção C++

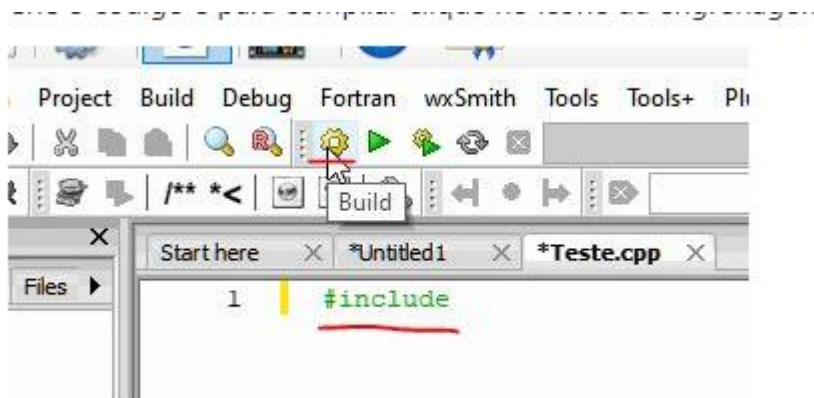

Clique nas reticências

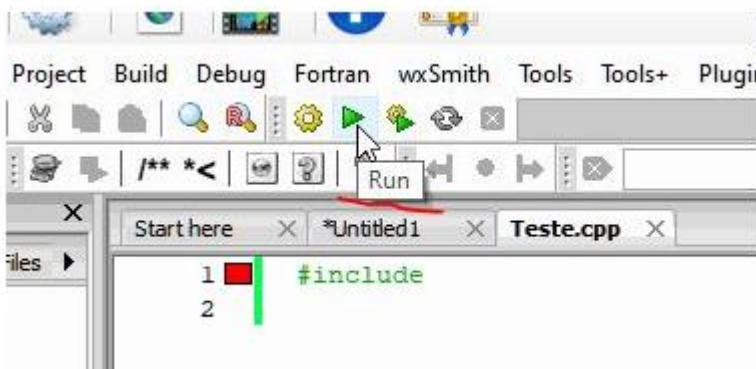

Escolha o local que vai salvar o arquivo

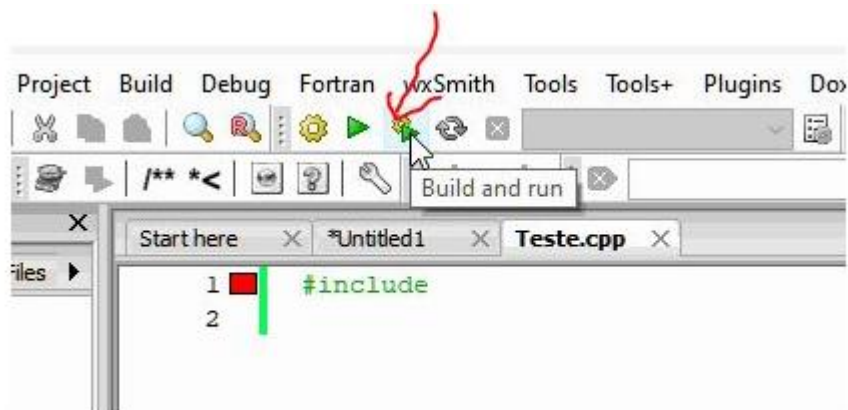

Crie o código e para compilar clique no ícone da engrenagem

Para executar clique no ícone Play Verde

Se quiser já compilar e logo depois executar clique neste ícone
